

GÖKHAN KATAR

DEVELOPER

ABOUT ME

As a Front-End Developer with strong expertise in Vue.js, Nuxt.js, and TypeScript, I specialize in building dynamic, user-focused, and scalable web applications. I have hands-on experience in UI/UX principles, responsive design, and cybersecurity-related platforms.

I excel at creating clean, maintainable code, integrating real-time features through APIs and composables, and visualizing data with tools such as Chart.js, Highcharts, and Leaflet.

Motivated by product impact, I collaborate effectively across teams, take initiative in ambiguous environments, and consistently deliver high-quality results.
