

GÖKHAN KATAR

M.E.R.N

Senior Frontend / Fullstack Developer
(Vue.js | React.js | Node.js | TypeScript)

SUMMARY

Senior frontend-focused fullstack developer with 10+ years of experience building scalable, high-performance web applications.

Specialized in modern JavaScript ecosystems including Vue.js, React.js, and Node.js, with strong expertise in TypeScript and component-based architecture.

Experienced in developing data-intensive applications, real-time systems, and performance-critical dashboards. Proven ability to design clean, maintainable architectures and deliver production-ready solutions.

Strong focus on performance optimization, user experience, and scalable system design.

EXPERIENCE

OXIT BİLİŞİM (Teknopark) – Software Development Specialist
2026 – Present

- Develop and maintain enterprise-level web applications using modern frontend and backend technologies.
- Build scalable and reusable user interfaces with Vue 3, Nuxt 3, React, Next.js, TypeScript, JavaScript (ES6+).
- Develop backend services and RESTful APIs using Node.js, Express.js, MongoDB, PostgreSQL and Mongoose.
- Design authentication and authorization systems using JWT, NextAuth, OAuth and role-based access control.
- Integrate third-party APIs, WebSocket-based real-time communication and payment services.
- Optimize application performance through code splitting, lazy loading, caching strategies and Core Web Vitals improvements.
- Collaborate with UI/UX designers and backend teams in Agile/Scrum environments.
- Deploy and maintain production environments using Docker, Nginx, Linux, Git, GitHub, CI/CD pipelines, Cloudflare, CDN, DNS and SSL.
- Participate in software architecture decisions, code reviews and technical mentoring while ensuring clean, maintainable and scalable codebases.

KLOUDSER TECHNOLOGY – Front-End Developer
2024 – 2025

- Developed modular component architectures using Vue 3, TypeScript and Composition API.
- Built dynamic dashboards, reporting systems and analytics panels.
- Collaborated with backend teams on REST API design and integration.
- Implemented state management with Pinia and optimized frontend performance.
- Improved user experience through responsive design, accessibility and reusable UI components.
- Followed clean architecture principles and maintainable coding standards.

UPWORK – Freelance Full Stack Web Developer
2017 – 2024

- Successfully delivered 30+ web applications for international clients.
- Built scalable Vue.js, Nuxt.js, React and Next.js applications handling complex dynamic datasets.
- Developed RESTful APIs and backend services using Node.js, Express.js and MongoDB.
- Implemented authentication systems, WebSocket integrations and third-party API connections.
- Improved SEO performance and Core Web Vitals through advanced optimization techniques.
- Managed complete production deployments including hosting, VPS, DNS, Cloudflare, CDN, SSL, Nginx and Linux servers.
- Worked directly with international clients, gathering requirements and delivering end-to-end software solutions.

EDUCATION

M.Sc. in Finance
Atılım University – Ankara, Turkey

B.Sc. in Insurance and Risk Management
Başkent University – Ankara, Turkey

SKILLS

Frontend

- Vue.js, Nuxt.js, React.js, Next.js
- TypeScript, JavaScript (ES6+)
- Composition API, React Hooks, Custom Hooks
- Tailwind CSS, DaisyUI, Vuetify
- Component-Based Architecture
- Responsive Design & Cross-Browser Compatibility

State Management

- Pinia, Zustand, Redux

Backend

- Node.js, Express.js
- REST API Design & Development
- WebSockets (Real-time Systems)
- Authentication (JWT, Session-based)
- File Upload & Data Processing

Database

- MongoDB
- PostgreSQL
- Large-scale JSON Data Handling

Architecture & Engineering

- Scalable Application Architecture
- Clean Code & Maintainable Structure
- Reusable Component Design
- API Integration & System Design
- Data-intensive Application Development

Performance & Optimization

- Performance Optimization (Large Data Rendering, Lazy Loading)
- Core Web Vitals Optimization
- Rendering Optimization (Memoization, Avoiding Re-renders)
- Handling Large Datasets without UI Blocking

Infrastructure & DevOps

- Git, GitHub
- CI/CD Pipelines
- Hosting & Deployment
- DNS, CDN, SSL Configuration
- Environment Management

Tools & Ecosystem

- Chart.js, Highcharts
- Axios, Fetch API
- Postman
- Vite, Webpack

Other

- Agile / Remote Team Collaboration
- Technical Problem Solving
- UI/UX Awareness
- Technical SEO
